

HQ  
SATELLITAL  
VOIP

## ABOUT US

WSN is a telecom and VoIP operator born in the incubation centre of the European Space Agency (ESA-BIC) in Barcelona. We are specialized in telecommunications and high-quality VoIP services in the maritime and terrestrial areas through our satellite links in the largest teleports in Europe.

Thanks to our years of experience in the telecommunications sector, we can provide solutions for the maritime sector, in satellite connectivity as well as IP telephony and our HQ service (High quality VoIP satellite).

We have become the reference satellite telecommunications operator on maritime connectivity in Europe. And now, from the Canary Islands, we will offer these solutions for Africa, facing the new challenges posed by the digital economy in this territory.

**NO  
GREY ROUTES**

Enjoy our new service  
"High Quality Satellite VoIP".

## Premium Communications Simple and Reliable

Because the important thing is to communicate with the world wherever you are. Whether from a ship in the middle of the Atlantic or in your company's office, you can enjoy a call of the highest quality through our satellite links that reduce the delay in package shipments and therefore improve the delay in communications.

### Features

- ✓ Broadband connectivity for ships
- ✓ No Grey Routes
- ✓ HQ Satellital VoIP
- ✓ Maximum quality in your calls

### Why should you choose us?

At WSN we focus on VoIP telephony service highlighting the audio quality in calls.

**WE DON'T USE GREY ROUTES.** We have our own network without grey routes, secure and developed for environments where the use of satellite is essential. Managed at all times by our team of highly qualified professionals with great experience that allows us to offer optimized solutions to measure.

### Our Systems

We are the world's first satellite VoIP platform with gateways in the main European teleports.

Through these gateways, we reduce the response time of communications and the fluctuation of sending packets through technologies applied in our servers. In addition, our infrastructure is based on Amazon Cloud Computing. Counting on the security and scalability offered by this new technology in the cloud.

### Our Services

Benefit from the services offered by WSN with the highest possible quality and the most competitive prices on the market. The new way of understanding communications.

#### IP PBX

Benefit from our cloud hosted service that allows companies to have a sophisticated telephone system without needing to make a high investment in a traditional physical switchboard. **Save on calls** and maintenance by having everything centralized. **Scalable** at any time, you set the pace of growth.

**If you have a better offer, we'll improve it!**

**Virtual switchboards from 30€ per month!.**

#### SIP Trunk

Experience the best telephone lines that work over IP using the SIP protocol.

**Reduce costs** and maintain **maximum quality** with our virtual telephone lines. We offer you a service through internet, forget about the physical cables. All you need is a **virtual switchboard** (or IP adapter) and a stable and dimensioned Internet connection.

**Check the geographical availability of your virtual numbers, from 9€/month.**

#### Connectivity

Specialized in **satellite telecommunications**, we offer the highest quality in any environment and anywhere in the world. In addition, we have **4G/LTE services in Spain**. Check the availability of your area without obligation. Connect to the internet wherever you are.

#### Consulting

From WSN we offer **tailored services** focused on meeting your requirements in information technology and telecommunications. Discover our projects and divisions. **We advise you** about your business.

**We empower maritime communications anytime, anywhere**
